DETAILED ACTION

Allowable Subject Matter

1. Claims 1-32 are allowed. The following is an examiner's statement of reasons for allowance: Prior art rowing devices are well known in the art. Huang (U.S.

5,447,444) as pictured below discloses a rowing machine having extension levers capable of movement, however the extension levers are not capable of movement relative to a movement arm in longitudinal, vertical, and transverse axes.

2. Jones (U.S. 5,304,107) as pictured also teaches a machine having extension members, and handles that rotate relative to the extension members. Jones fails to teach or make obvious the extension levers capable of movement relative to a movement arm in longitudinal, vertical, and transverse axes.

3. Webber (U.S. 6,561,560) as pictured

longitudinal, transverse, and vertical axes, and handles connected to the extension members capable of freely rotating about the extension members. Webber fails to teach or make obvious having the extension members rigid.

4. The prior art of record fails to teach or make obvious the features of a pivotal movement arm attached to a frame, a pair of rigid extension members attached to the movement arm so that the extension members may move in a vertical, transverse and longitudinal axis with respect to the movement arm, and handles attached to the ends of the extension members so that they may freely rotate with respect to the extension members.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
